Mohd Shoaib Khan

Full-Stack MERN Developer

+91-73102 49234 | info@mohammadshoaibkhan.com | LinkedIn | Portfolio | GitHub

SUMMARY

Full-Stack MERN Developer with 3+ years of experience building scalable web and mobile applications, RESTful APIs, CRM systems, and fintech platforms. Skilled in React.js, React Native, Node.js, Express.js, MongoDB, and MySQL, with hands-on experience in authentication, role-based access control, third-party API integrations, and performance optimization. Experienced in developing loan management systems, customer on boarding workflows, verification solutions, e-commerce, and delivery platforms.

WORK EXPERIENCE

Fly Digi Loanyfytech and Solution Private Limited — Jan 2024 – Present

Tech Stack: *React, React Native, Node.js, Express.js, MongoDB, MySQL, JWT*

- Led the end-to-end development of Loanyfy's MERN-based web platform and mobile app from the ground up, architecting scalable fintech solutions for loan origination, disbursement, and customer relationship management.
- Developed core modules for loan management, client on boarding, lead tracking, and CRM workflows, streamlining financial operations and reducing manual processing time across teams.
- Integrated PAN, CIBIL, payroll, and other customer data verification APIs to support KYC, credit assessment, and financial validation processes, improving accuracy and turnaround time for approvals.
- Built secure REST APIs, JWT-based authentication flows, and role-based access control, along with responsive user interfaces, to improve operational efficiency and user experience across web and mobile platforms.
- Collaborated closely with product and design teams to translate business requirements into technical specifications, ensuring timely delivery of features in a fast-paced fintech environment.

SKILLS

Programming Languages: JavaScript (ES6+), HTML5, CSS3, SQL
Frontend Development: React.js, Next.js, React Native, Redux/Context API, Responsive Web Design
Backend Development: Node.js, Express.js, RESTful API Design, MVC Architecture, Radis
Databases: MongoDB, Mongoose, MySQL, Database Design & Modeling
Authentication & Security: JWT, OAuth, Role-Based Access Control (RBAC), Bcrypt
Development Practices: Third-Party API Integration, Performance Optimization, Agile Methodology, MERN Stack Architecture
Tools & Deployment: Git, GitHub, GitLab, VS Code, Postman, Vercel, Render, Hostinger

PROJECTS

PLP Bazar — Online Grocery & Food Delivery Platform & Mobile App App Live

Tech Stack: *React.js, Node.js, Express.js, MySQL, React Native, REST APIs, JWT*

- Developed a complete online grocery and food ordering platform with web and mobile applications using the MERN.
- Built separate role-based dashboards for grocery and restaurant owners, enabling independent management of inventory, menus, and incoming orders in real time.
- Developed secure backend REST APIs using JWT authentication and role-based access control (RBAC) for users and admins.
- Designed a dedicated super admin dashboard for centralized platform control, giving every user type — customers, vendors, and admins — its own secure dashboard.

AlrasCars — Car Rental Platform Live

Tech Stack: *React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, REST APIs*

- Designed and developed a full-stack MERN car rental platform with real-time booking and availability management.
- Implemented product browsing, cart, checkout, and order management functionality using a component-based React architecture.
- Built responsive interfaces and integrated RESTful APIs for seamless ordering and delivery management.
- Developed role-based features for both customers and administrators to manage products, orders, and deliveries.

EDUCATION

United Institute of Technology, Prayagraj — **August 2020 – June 2024**
B.Tech – Computer Science and Engineering | CGPA: 7.0 — *Prayagraj, Uttar Pradesh*
